

WEBINAR

Automation with AI tools: Empowering today's Medical Services Professionals

<https://www.greeley.com/insights/automation-ai-tools-empowering-todays-medical-services-professionals>

The digital shift is here and MSPs are at the center of it. Artificial Intelligence and Business Intelligence enabled automation is transforming credentialing, privileging, onboarding, and performance monitoring, positioning MSPs to lead with greater influence across the healthcare landscape.

After attending this session, participants will be able to:

- Explain how AI/BI-enabled automation is accelerating change across credentialing, privileging, onboarding, and performance monitoring.
- Evaluate key implementation factors, workforce readiness, ethics, and regulatory considerations.
- Demonstrate how MSPs can lead technology adoption while preserving human judgment essential to quality and patient safety.
