COURSE DESCRIPTION

This comprehensive program is designed for medical leaders who are ready to elevate their impact in today's complex healthcare environment. This course builds on the content from key Greeley courses including Medical Executive Committee Institute and Physician Leadership Institute course. The program aims to strengthen decision-making, increase collaboration across multidisciplinary teams, foster integration and system-ness, and leverage innovation to improve performance, patient safety, and organizational outcomes. Participants will engage in an interactive, case-based learning session designed to equip them with practical strategies and tools for leading change, enhancing performance, and achieving transformation at the system level.

PROGRAM GOAL

To equip provider leaders and healthcare executives with advanced leadership competencies, strategic insights, and practical tools to **navigate organizational complexity, drive system-level integration, and lead transformative change** in today's evolving healthcare environment.

LEARNING OBJECTIVES

Upon completion of this program, participants should be able to:

- Understand how to analyze and apply strategic planning principles to elevate a health system or hospital
- Describe how to evaluate and implement key strategies for transitioning from a hospital-centric model to an integrated healthcare system
- Understand how to adapt physician leadership practice to meet evolving organizational and clinical challenges
- Understand how to navigate the evolving role of Advanced Practice Professionals (APPs) within medical staff structures
- Explain how to differentiate physician-hospital and health system arrangements and apply strategies for accountability and performance management
- Identify how to leverage digital transformation and AI tools to enhance physician leadership and drive organizational change
- Understand how to lead and manage change effectively in complex healthcare environments, leverage frameworks, tools and techniques
