

Peer Review Boot Camp

Peer review education for physician leaders, medical staff leaders, and quality teams

Custom program: Tailored to your organization's goals, structure, and peer review challenges

Peer review is one of the most important—and most sensitive—responsibilities of the organized medical staff. When the process is inconsistent, overly punitive, or poorly understood, it can weaken physician trust, create leadership frustration, and limit improvement. This course helps physician and medical staff leaders build a more fair, consistent, and improvement-focused peer review process. Your team will gain practical tools to strengthen case review, clarify OPPE and FPPE, improve committee effectiveness, and support quality, safety, and accountability across the organization.

Why consider this course:

This program is designed to help leaders move beyond theory and equip their teams with a practical, defensible approach to peer review that supports physician improvement and organizational performance.

- **Build physician trust in the process:** Create a more collegial, improvement-focused culture by shifting peer review away from a punitive "gotcha" experience.
- **Improve consistency and fairness:** Reduce variability and bias in case review decisions with practical frameworks that strengthen credibility and reliability.
- **Clarify OPPE and FPPE:** Help leaders understand how to design, interpret, and use performance evaluation tools as part of an effective improvement strategy.
- **Prepare current and emerging leaders:** Give committee chairs, members, and support staff the confidence and skills to lead peer review effectively.
- **Strengthen defensibility and reduce risk:** Learn leading practices that support sound structure, appropriate escalation, and more defensible peer review processes.

Ideal for cross-functional medical staff leadership teams:

- Medical Staff Officers
- CMO/VPMA
- Department Chairs
- Peer Review Committee Chair & Members
- Quality Committee Chair
- Staff who support the peer review function

Bring peer review education directly to your organization.

We will work with you to tailor the program to your leadership audience, current challenges, and learning goals. Contact our sales team to discuss delivery options, scope, and pricing.

“Packed with useful information! So many takeaways and to do's. I felt like I could not look away for a minute and the hours flew by. One of the best educational offerings that I've ever attended.”

Nicole Williams, RN, CPHO

Peer Review Coordinator, Presbyterian Healthcare System

Course modules and what you will learn in each section:

The following modules are designed for a 12-hour course from our national seminar. For a custom education engagement we will work with you to select modules and modify them based on your needs. An engagement like this will be designed around your organization's priorities, from peer review fundamentals to advanced case review, committee effectiveness, and practical next steps for strengthening your current process.

MODULE	WHAT YOU WILL LEARN
Improvement-focused peer review	Shift peer review toward fairness, accountability, and practitioner improvement while strengthening alignment with quality and safety goals.
Reliable case review methods	Apply practical approaches that improve consistency, reduce bias, and support more credible case review decisions.
OPPE and FPPE application	Build clearer understanding of how to design and use OPPE and FPPE as part of an effective performance-improvement system.
Committee and leadership effectiveness	Equip physician leaders, committee members, and support staff to run a more effective, defensible, and action-oriented peer review process.
Actionable next steps	Translate learning into practical improvements your organization can apply immediately after the program.
